

AT Heatshrinkable Tubing **Multi-Purpose Dual-Wall Tubing**

Application

AT Dual-Wall tubing is a flexible, high shrink ratio, flame retardant, UV resistant, heatshrinkable polyolefin tubing with an inner meltable adhesives layer, which flows when heated.

AT tubing is suitable for sealing and protecting a wide variety of electrical applications, including wire splices, sealing connectors and transition between cables and connectors.

Features

- Good mechanical strength
- High UV resistance
- Good weatherability
- Excellent chemical resistance
