

TRTB 12 Way Fibre Optic Termination Unit

Application

The TRTB 12 Way is a purposely designed fibre optic termination unit that can accommodate 12 fibres with in a fibre splice organiser for bare fibre management and protection

The TRTB 12 Way is designed for fibre optic terminations up to 12 fibres with a specially designed fibre organizer. The organizer is to eliminate any excessive bending radii and to adopt an acceptable bending radii when routing fibre tubes to the organizer. A special organizer cover offers separate bare fibre management and protection.

The organizer can accommodate up to 24 splice protectors.

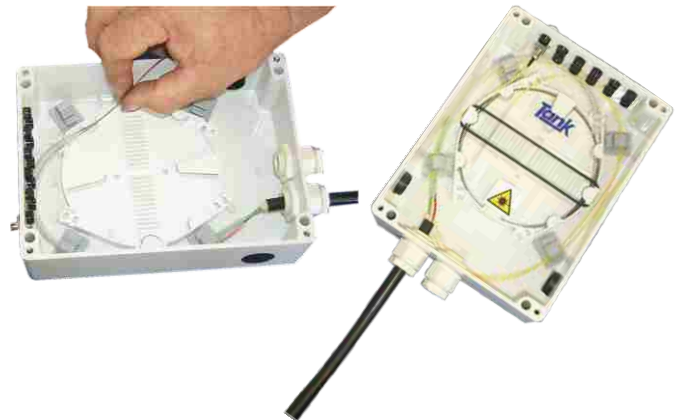

The TRTB has 4 strategically placed cable entry ports that can accommodate a variety of cables.

The TRTB has pre-drilled mounting holes for easy and faster application. The TRTB can accommodate any type of middle alignment sleeve.

The TRTB is manufactured from HDP.
