

TUG Mini

Distribution Dome Closure

Multi Entry Distribution Dome Closure

Application

TUG Mini distribution closure is a mechanical dome closure available in various sizes to suit your requirements.

The **TUG** Mini is a multi entry system using the proven heatshrinkable system for sealing.

Suitable for local and subscriber cable, jelly filled or air core cables.

TUG Mini's are suitable for direct buried, jointing pits, non-standard jointing pits and manhole applications.

Each **TUG** Mini's incorporate two to three large flexible entry distribution tails and five smaller flexible distribution tails which are factory fitted with heatshrinkable sleeves.

The **TUG** Mini's are supplied with or without a valve for flash testing, valves are fitted with corrosion protection valve covers.

Galvanised wall or pole mounting brackets are available.

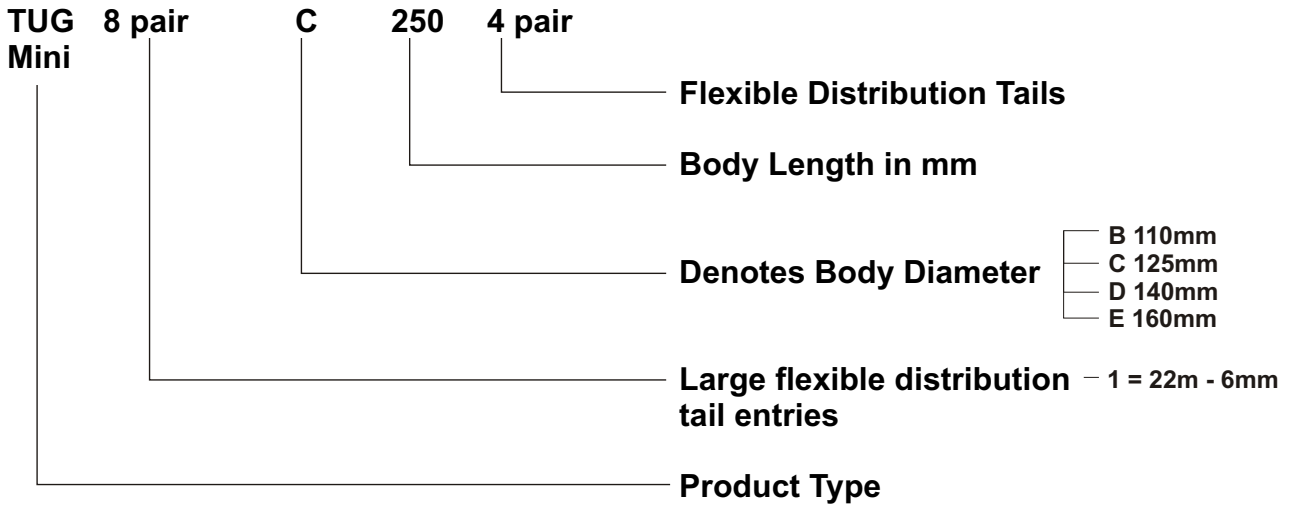

Installation is installer friendly, simple, uncomplicated and no special tools are required.
